### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James H. Walters on February 14, 2008.

2. The application has been amended as follows:

2. (currently amended) A method of identifying a bridge uplink port in a network, comprising the steps of: (a) sending an ICMP ping to all ~~known~~ bridges known within said network and ~~thereby~~ causing forwarding data base tables of said bridges to store MAC addresses and interface indices of adjacent bridges; (b) sending an SNMP query to a selected bridge to retrieve stored contents of a forwarding data base table of said selected bridge; (c) for any interface index retrieved from said selected bridge, identifying a port associated with said interface index as an uplink port of an adjacent bridge; (d) downloading the contents of all of said forwarding data base tables of said known bridges; (e) counting a number of MAC addresses associated with each port of said bridges; and (f) identifying a port as an uplink port if said

number of MAC addresses counted exceeds a predetermined number.

4. (currently amended) A test instrument operation method for employing the test instrument to identify a bridge uplink port in a network, comprising the steps of: connecting the test instrument to the network; sending from the test instrument an ICMP ping to all ~~known~~ bridges known within said network and ~~thereby~~ causing forwarding data base tables of said bridges to store MAC addresses and interface indices of adjacent bridges; sending an SNMP query from the test instrument to a selected bridge to retrieve stored contents of a forwarding data base table of said selected bridge; and for any interface index retrieved from said selected bridge, having the test instrument identify a port associated with said interface index as an uplink port of an adjacent bridge; downloading to the test instrument the contents of all of said forwarding data base tables of said known bridges; counting a number of MAC addresses associated with each port of said bridges; and identifying a port as an uplink port if said number of MAC addresses counted exceeds a predetermined number.
